Study of Various Network Commands Used in Linux and Windows

Aim:

To study and practise the basic network commands available in Linux and Windows.

Requirements:

* A computer with Linux (Ubuntu) and/or Windows
* Internet / LAN connection

Commands Observed:

Purpose	Linux	Windows
Display IP configuration	ifconfig / ip addr	ipconfig /all
Check connectivity	ping <host>	ping <host>
Trace route to a host	traceroute <host>	tracert <host>
Display routing table	route -n / ip route	route print
Display connections / ports	netstat -a / ss -tuln	netstat -a
DNS lookup	nslookup / dig <domain>	nslookup <domain>
Display ARP cache	arp -a	arp -a
Display host name	hostname	hostname
Network statistics	netstat -s	netstat -s
Capture packets	tcpdump	(Wireshark)
Network manager / interfaces	nmcli, ~~ifconfig~~ iwconfig	netsh
Download a file / web content	wget / curl <url>	curl <url>
Remote login	ssh user@host	ssh user@host

Procedure:

1. Open the terminal (Linux) / Command Prompt

(Windows).

2. Execute each command listed above.
3. Observe and note the output of every command.

Result:

The basic network commands in Linux and Windows were studied and observed.
